SUMMARY

Designing and Developing End-to-End Web Solutions with .NET Technologies. My analytical and problem-solving skills enable me to deliver high-quality solutions.

PROJECTS

Therapy Management

📅 08/2022 - Present 📍 Pune

Therapy Management's major purpose was to assist persons who required special medication treatment. Key features include Customer, Member, and Program management, enhancing the ability to adapt healthcare services.

The system integrates dynamic document generation, utilizing templates with merge fields and dynamic tables for personalized Letter and Fax creation

Roles and Responsibility:

- Communicating with the client to gather project requirements, analysis, design, and development
- Develop backend functionality and APIs to enhance frontend capabilities.
- Design and implement user interfaces using ASP.NET, HTML5, CSS3, Telerik UI, Bootstrap and JavaScript.
- MS SQL Server for creating tables, views, stored procedures, functions, SQL Agent Job.
- Reports on the SQL Server Reporting Services.
- Console Applications to run independently for refreshing data, sending survey question via sms.

Technology : ASP.NET, C#, SQL Server, Telerik UI, HTML & CSS, Bootstrap, SSRS Report, Aspose.

Perform Prior Authorization

📅 01/2022 - 07/2022 📍 Pune

Perform Prior Authorization involves creating orders for drugs, performing workflows like Approval, Partial Approval, Closed, and Denial, and obtaining approval from the Pharmacy Benefit Manager. We can create PA using Customer, Member, Provider, Drug, and Medical Information

Roles and Responsibility:

- Communicating with the client to gather project requirements, analysis, design, and development
- Develop backend functionality and APIs to enhance frontend capabilities.
- Design and implement user interfaces using ASP.NET, HTML5, CSS3, Telerik UI, and JavaScript.
- MS SQL Server for creating tables, views, stored procedures, functions

Technology : ASP.NET, C#, SQL Server, Telerik UI, HTML & CSS
